

Hopper Whole-Home HD DVR System Now Available From DISH

DISH Network L.L.C., the nation's third largest pay TV provider, announced today the availability of the [Hopper™](#), the fastest, most powerful, technically advanced whole-home high definition DVR entertainment system.

The Hopper was first introduced at the 2012 International Consumer Electronics Show where it was awarded the [Popular Mechanics "Editors' Choice" Award](#), recognized as a finalist by CNET, and honored with a CES Innovations 2012 Design and Engineering Award.

The Hopper system lets viewers share DVR content on TVs throughout the home. Customers can pause, play and rewind both live and recorded HD programs in up to four rooms using a Hopper and small units called "Joeys™" that work in tandem with the main Hopper unit.

Other Hopper highlights include the following:

- Two-terabyte hard drive for up to 2,000 hours of entertainment
- PrimeTime Anytime™ - customers, with a single click, can enable recordings of four primetime HD network channels, where available, and store them for up to eight days
- Record up to six HD shows at once during primetime hours
- Ability to watch HD programs and control the DVR in up to four rooms

The Hopper system is available through the [DISH lease program](#). New DISH customers who subscribe to DISH's America's Top 200 or DishLATINO Dos programming packages or greater can receive one Hopper and up to three Joey units for free, including a standard professional installation. The Hopper system requires a whole-home DVR fee of \$10 per month and \$7 per month for each Joey.

"Whether watching your favorite primetime network show or the men's college basketball championship games, there's no better way to enjoy TV than 'jumping' from room to room using the award-winning Hopper and Joey," said DISH Network CEO Joe Clayton. "The Hopper, named after DISH's new kangaroo mascot, delivers network TV shows on demand and thousands of movie choices streaming or delivered to the hard drive; it's a slam dunk in providing the most entertainment options for the entire family."

DISH is promoting the Hopper through national TV advertising starting today. Visit [here](#) or www.youtube.com/dish to watch a TV spot.

New Must-have Feature -- PrimeTime Anytime™

The Hopper's unparalleled feature, called [PrimeTime Anytime](#), allows customers, with a single click, to enable recordings -- using a single tuner -- of all primetime TV shows on ABC, CBS, FOX and NBC. PrimeTime Anytime records three hours of network programming in high definition, where available, every night from 8 p.m. to 11 p.m. ET Monday through Saturday and from 7 p.m. to 11 p.m. ET on Sunday.

“The Hopper, named after DISH's new kangaroo mascot, delivers network TV shows on demand and thousands of movie choices streaming or delivered to the hard drive; it's a slam dunk in providing the most entertainment options for the entire family.”

The Hopper stores the primetime programs for eight days after they have aired. This creates an on-demand library of approximately 100 hours of primetime TV shows, making it easy to catch up on missed episodes.

For Internet-connected customers, The Hopper's on-demand capabilities give access to DISH's [Blockbuster @Home™](#) for \$10 per month, providing thousands of movies and TV shows streaming to the TV.

The Ultimate TV Everywhere Experience

The Hopper offers the ultimate TV Everywhere experience. Customers can manage their Hopper's DVR and timers via the Internet at www.dishonline.com or from the DISH Remote Access app available for tablets, smartphones and computers. Connecting the Hopper with the DISH Sling® Adapter provides customers the ability to watch and control all live TV channels and their DVR from their tablet, smartphone and computer wherever they go.
