

# Sprint and DISH to Trial Fixed Wireless Broadband Service

OVERLAND PARK, Kan. & ENGLEWOOD, Colo.--([BUSINESS WIRE](#))--Sprint Corporation (NYSE: S) and DISH Network Corporation (NASDAQ: DISH) announced today they plan to jointly develop and deploy a fixed wireless broadband service, on a trial basis, in Corpus Christi, TX that will be available in the middle of 2014. The service will initially be available in limited areas of Corpus Christi with a plan to expand into additional markets in the future.

Depending on a customer's location, DISH will install either a ruggedized outdoor router or an indoor solution to deliver the best possible broadband service to that site. Both solutions will feature built-in high-gain antennas to receive the 4G TDD-LTE signal on Sprint's 2.5 GHz spectrum.

"With millions underserved by inadequate broadband, the potential to bring a high-speed fixed wireless solution is very compelling to both DISH and Sprint," said Tom Cullen, DISH executive vice president of Corporate Development. "We both bring distinct skills, not the least of which for DISH is a workforce of professional technicians who visit thousands of homes every day performing professional installations for both video and broadband."

"This trial with DISH has great potential as it combines the key capabilities and assets of both companies to provide another option to customers with limited broadband access," said Michael Schwartz, Sprint senior vice president of Corporate and Business Development. "This demonstrates Sprint's ongoing commitment to identify and develop new and innovative products and services that maximize the use and utility of our spectrum and flexible network infrastructure to the benefit of customers and shareholders."

## About DISH
