

DISH Applauds Copyright Ruling Upholding Rights of Consumers to Use Slingbox and Other Key Hopper Features

*Decision is first to apply Supreme Court's opinion in Aereo to other technology
Decision Upholds Rights of Consumers to use AutoHop, PrimeTime Anytime and Transfers Features*

ENGLEWOOD, Colo.--([BUSINESS WIRE](#))--Today, the United States District Court, Central District of California, publicly released its summary judgment decision upholding the rights of consumers under U.S. copyright law to use Slingbox™ technology and the AutoHop™, PrimeTime Anytime™ and Transfers features of DISH's Hopper® Whole-Home HD DVR.

The following statement is attributable to R. Stanton Dodge, DISH executive vice president and general counsel:

"This decision is the sixth in a string of victories in federal courts on both coasts for the American consumer related to our Hopper Whole-Home DVR platform. We are proud to have stood by their side in this important fight over fundamental rights of consumer choice and control.

"DISH is pleased that the Court has again sided with consumers by issuing a summary judgment decision upholding their rights under U.S. copyright law to use Slingbox technology and the AutoHop, PrimeTime Anytime and Transfers features of the Hopper Whole-Home HD DVR.

"Consumers are the winners today, as the Court sided with them on the key copyright issues in this case. This decision has far reaching significance, because it is the first to apply the Supreme Court's opinion in Aereo to other technology.

"We will continue to vigorously defend consumers' rights to choice and control over their viewing experience."

Slingbox technology, which is built into DISH's second-generation Hopper Whole-Home DVR, provides a DISH customer, once they receive a television signal in their home, with the capability to remotely view that signal from a single Internet-connected device (mobile phone, tablet or PC). Slingbox technology has been available since 2005 and this action was the first to seek to enjoin it.

With the PrimeTime Anytime feature, users have the ability to easily record the primetime shows on up to each of the four broadcast networks (ABC, CBS, NBC and Fox) and save them for up to eight days. The AutoHop feature can be enabled by users to play back certain PrimeTime Anytime recordings commercial-free.

With the Transfers feature, a DISH customer can move or duplicate certain Hopper DVR recordings made by the customer to a mobile phone or tablet; and no Internet connection is needed for viewing.

“This decision is the sixth in a string of victories in federal courts on both coasts for the American consumer related to our Hopper Whole-Home DVR platform. We are proud to have stood by their side in this important fight over fundamental rights of consumer choice and control.”
