"In January, we promised our customers that DISH Network would boost our national HD channel lineup to 100 by year's end. Today, we are proud to say that in less than one year, not only did we deliver on our commitment, but we exceeded it," said Eric Sahl, senior vice president of Programming for DISH Network. "We continue our pledge to DISH Network subscribers to add more national channels and local HD markets, as well as offer the best sports and movies in HD."

In addition, DISH Network is thrilled to introduce TurboHD, the first-ever 100 percent, all-HD programming package in the pay-TV industry, with advanced equipment that works on all TVs. TurboHD offers the most-watched HD channels in four separate tiers and can be viewed on analog, digital and high definition TVs, making it the perfect solution for consumers who have or are considering upgrading to HD programming. All TurboHD packages can include HD locals where available.

"TurboHD is revolutionary to the industry; we're changing the way people watch TV by offering them all of the top channels - in HD only - with the best high-definition systems on the market," said Jessica Insalaco, Chief Marketing Officer for DISH Network. "When consumers add HD programming, their viewing habits change - they don't like to go back to standard definition - so their viewing switches over to all-HD channels. TurboHD will provide the next-generation high-definition television experience by offering only the best in HD programming and award-winning HD technology at incredible prices."
